SKILLS JavaScript, Python, React, Redux, PostgreSQL, MySQL, Express, Node.js, Flask, SQLAlchemy, Svelte, Git, HTML5, CSS3

PROJECTS

FilmUp (JavaScript, Node.js, Express, Postgres, Pug, HTML5 and CSS3)

[Live Site](#) | [Github](#)

A collaborative Fullstack clone of GoodReads, where users can leave reviews and 'vault' movies.

- Composed Sequelize queries to fetch all movies from the Postgres database to showcase our recently added catalog of movies.
- Built the landing page where a user can view information about an individual movie along with CRUD functionality for reviewing, 'vaulting', and watching.
- Developed AJAX functions to allow users to select whether a movie has been watched without a page re-render.

Gamendar (Python, Javascript, React, Redux, Flask, Express, Postgres HTML, CSS, and AWS)

[Live Site](#) | [Github](#)

Calendar-centric and social application for video game releases.

- Created a dynamic calendar with the help of Moment.js to render an accurate calendar for the current month.
- Utilized React allowed for CRUD functions for commenting on any particular game on the corresponding day of release.
- Stylized each calendar to display game art in an aesthetically pleasing manner using CSS.
- Maintained an Amazon Web Services bucket that hosted game art allowing art assets readily available and allowed for the application to remain lightweight.

Cloudify (Python, Javascript, React, Redux, Flask, Express, Postgres HTML, CSS, and AWS)

[Live Site](#) | [Github](#)

A collaborative Fullstack application clone of SoundCloud where users can upload, review and play music from other users.

- Manufactured a Redux store designed to assist with the changing state of which audio file is playing.
- Constructed the PlayBar, a React component, to dynamically display the audio metadata for a currently playing song.
- Collaborated using wavesurfer.js to provide the functionality to play, pause, and set the volume on a selected song.

EXPERIENCE

Technical Support Analyst - CrossLink, Orlando, FL

Dec 2019-Mar 2020

- Provided customers with solutions and assistance for technical issues with the CrossLink software via screen sharing, replicating issues, and demonstrating how to circumvent them on their own.
- Onboarded over 1000+ customers through setting up local and private homegroup networks to allow seamless communication and connectivity between the different workstations in a given office in which the CrossLink software was to be used.
- Navigated customers through software via screen sharing to ensure efficiency and comprehensibility of features and options.
- Conducted, on average, ~20 daily outbound calls detailing and assisting the resolution of internal tickets for issues that required in-depth research or a patch/software update to fix.

Analyst / Registrar - Remington College, Heathrow, FL

Sept 2015-Jul 2019

- Processed about 80+ new, active, and returning students, on average, for 12 of the 17 campuses to determine eligibility status.
- Identified scheduling and curriculum conflicts and overlaps by conducting manual routine audits of the 12 campuses and provided unique resolutions which ultimately led to saving millions of dollars in expenses.
- Created SQL queries to find requested, targeted information from the MySQL database which gave upper management insights and data needed to enhance school-wide decisions and strategic plans.
- Manually validated credits and hours via an internal routine audit that complied with program and degree requirements.
- Followed governmental policies and procedures to aid 12 campuses to make academic and administrative decisions.

Customer Service Representative - Aon Hewitt, Orlando, FL

Nov 2014-Sep 2015

- Ensured and aided fellow colleagues in conducting research to provide effective resolutions to those with unique problems.
- Conducted internal research using policy documentation to assist customers and claims adjusters to solve escalated claims for appropriate company benefit expenses.
- Welcomed inbound calls to assist customers with their accounts for various pre-tax benefits.

EDUCATION

App Academy Online

Oct 2020-Apr 2021

- Rigorous 1000+ hour coding curriculum centered around full-stack development in collaborative and independent environments including engineering fundamentals, such as object-oriented programming, test-driven development, and coding best practices.

Udemy Online

Aug 2019-Dec 2019

- Comprehensive coding course teaching entry to **advanced level Python** by Jose Portilla / AI Sweigart
- Immersive **MySQL** course that taught **complex database creation** and report building by Colt Steele.
